

Alice Miller

Python Developer | AI & Machine Learning Enthusiast

Email: alice.miller@example.com | Phone: +1-555-123-4567 | LinkedIn: linkedin.com/in/alicemiller | GitHub: github.com/alicemiller

Professional Summary

Python Developer with experience building scalable backend applications and AI-powered solutions. Skilled in Python, FastAPI, REST APIs, machine learning, LLM integration, vector databases, and cloud deployment. Passionate about developing intelligent applications using modern AI frameworks.

Technical Skills

Languages: Python, SQL, JavaScript

Frameworks: FastAPI, Flask, Django

AI/ML: LangChain, LangGraph, Hugging Face Transformers, OpenAI API, Google Gemini API, Scikit-learn, Pandas, NumPy

Vector Databases: FAISS, ChromaDB

Databases: MongoDB, PostgreSQL, SQLite

Tools: Git, Docker, VS Code, Postman

Professional Experience

Python Developer (2024–Present)

Designed REST APIs with FastAPI, integrated AI models, implemented authentication, optimized database operations, and developed document processing pipelines using embeddings and vector search.

Projects

- AI Resume Screening System using FastAPI, LangChain, FAISS, and LLMs.
- Recruitment Assistant with resume parsing, skill matching, interview question generation, and candidate ranking.
- RAG Question Answering System using vector embeddings and document retrieval.
- PDF Document Analyzer using PyPDF and semantic search.

Education

Bachelor of Computer Science (Example University)

Certifications

Python Programming, Machine Learning Fundamentals, Generative AI, LangChain & LLM Applications

Strengths

Problem Solving • AI Application Development • Backend Engineering • REST API Design • Team Collaboration
